Industrial Valves from SVF Flow Controls are anything but ordinary. Designed for durability, our process-quality ball valves have features which make them widely compatible and easy to install.

**Industrial Ball Valve features:**
- Three-piece construction enable the valves to meet a wide range of piping requirements
- Bi-directional flow, pressure-assisted sealing guarantees tight shut-off and low torque
- Blowout proof stem and live loaded stem seal design automatically adjusts for wear and thermal cycling
- Encapsulated body seal allows for field welding without disassembly
- Wide variety of options, accessories and materials
- ISO 5211 mounting pad design
- Three-Piece valve features “swing-out” design for ease of maintenance

</tbody>
</table>

- Available in a variety of flow patterns
- Self-relieving seats that reduce operating torque and improve seat life
- Encapsulated body seals to facilitate welding without disassembly (D8 Only)

- Standard seat material on D8 Series is TFM1600™
- Standard seat material on T7 Series is PTFE
High-pressure applications require precision engineering, rugged construction and special features for advanced performance and safety. SVF Flow Controls offers a full range of high-pressure valves for all high-pressure applications including hydraulics, steam, chemical, oil and gas.

**H7**
High Pressure to 6000 psi
Three-Piece Ball Valves
Standard Port

</table>

- Full ported flow path in a high performance design for process-quality applications
- Encapsulated body seals to facilitate welding without disassembly
- ISO 5211 mounting pad for easy actuation
- Three-piece “swing out” design offers easy access for in-line maintenance
- Live-loaded stem seal ensures seal-tight pressure containment even under thermal cycling
- Blowout proof stem adds safety and reliability
SVF Flow Controls Flanged Ball Valves

SVF Flow Controls flanged valves are available in Stainless Steel or Carbon Steel, Standard Port or Full Port ranging in sizes from 1/2” to 8”.

**Flanged Ball Valve features:**
- Standard Fire Safe Certification to API 607, Anti-Static design
- Standard NACE MR0175
- Live-loaded stem seal ensures seal-tight pressure containment even under thermal cycling.
- Blowout proof stem adds safety and reliability.

### 41C
**ANSI Class 150**
**Standard Port Flanged Ball Valve**

<table>
<thead>
<tr>
<th>Sizes</th>
<th>Materials</th>

</tbody>
</table>

- Standard ported valves certified to API-607, Anti-Static design
- Standard NACE MR 0175
- Live-loaded stem seal ensures seal-tight pressure containment even under thermal cycling
- Standard seat material is TFM1600™
- Optional SupraLon™ seats for higher temperature, steam, and thermal fluid applications
- ISO 5211 mounting pad for easy automation
- Compatible with a full range of actuators and accessories
- Latch lock handle fully compatible with OSHA clamp for Lock-Out/Tag-Out on all manual valves

### B41C
**ANSI Class 150**
**Full Port Flanged Ball Valve**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

- Full ported ball valves certified to API 607, Anti-Static design
- Certified to API-608 to meet the additional design, operational and performance requirements of the Petroleum Refining, Petrochemical Processing and Chemical processing Industries
- Standard NACE MR 0175
- Chevron (V- Ring) stem seals assures low friction and leak tight performance (available in PTFE Only)
- Standard seat material is TFM1600™
- Optional SupraLon™ seats for higher temperature, steam, and thermal fluid applications
- Latch lock handle fully compatible with OSHA clamp for Lock-Out/Tag-Out on all manual valves
- Live-loaded stem seal ensures seal-tight pressure containment even under thermal cycling
- Built-In ISO 5211 direct mounting pad
### B42C
**ANSI Class 300**
**Full Port**
**Flanged Ball Valve**

- Full ported ball valves certified to API 607, Anti-Static design
- Standard NACE MRO175
- Built-In ISO 5211 direct mounting pad for easy actuation
- Chevron (V-Ring) stem seals assures low friction and leak tight performance (PTFE only)
- Standard seat material is TFM1600™
- Optional SupraLon™ seats for higher temperature, steam, and thermal fluid applications
- Standard locking handle in both open and closed positions
- Blowout proof stem adds safety & reliability

### MB51
**ANSI Class 150**
**Full Port**
**Multi-Ported Flanged Ball Valve**

- Designed & built for superior performance
- L-Port and T-Port options
- Positive shut-off on any of the three ports
- Built-In ISO 5211 direct mounting pad for easy automation
- Blowout proof stem adds safety and reliability
- Full ported ANSI 150

<table>

CleanFLOW™ hygienic ball valves by SVF Flow Controls are true process components, specifically engineered to meet the demanding requirements of pharmaceutical, biotech, semiconductor, cosmetics, food & beverage and other industries where particle generation and contamination can threaten the outcome of processing. All CleanFLOW™ ball valves are available with controlled delta-ferrite chemistry.

- ASME-BPE compliant
- Complete 316L Stainless Steel construction
- Weld bosses for easy purge porting on ends
- ISO 5211 mounting pad for easy actuation
- Encapsulated body seals to facilitate welding without disassembly
- Controlled delta-ferrite chemistry
- Drainable design with “Tube-ID” dimensions
- Cavity filled TFM1600™ seat option available
- Complies with 21 CFR 177.1550
- Tube-OD ends designed for orbital welding

</tr>
</tbody>
</table>

- Multifunctional valve providing three stages of fluid control; SERVICE, OPEN AND TRAP
- Delivers full flow of clean steam through “Tube-ID” porting
- Meets ASME-BPE guidelines for full flow, drainability, surface finish and materials
- Side Port design
- L-Port and T-Port options
- Blowout proof stem adds safety and reliability
- Positive shut-off on all three ports

### SERVICE STAGE

In the Service Position the steam trap is isolated from the steam, allowing the trap to be removed for maintenance.

### OPEN STAGE

In the Open Position the steam trap is isolated from the flow allowing sterilization temperature to be reached.

### TRAP STAGE

Allows condensate to flow past the ball purge holes during normal operation, by-passing the upstream seat.

In the Trap Position the valve body cavity remains hot.

The point-of-use or sampling connection is isolated by the ball surface.
CleanTECH™ ball valves by SVF Flow Controls are competitively priced, manual and automated ball valve solutions for semiconductor, food & beverage, dairy, flavorings and cosmetics & fragrance. All materials comply with applicable ASTM material specifications as well as FDA and USDA requirements.

SVF Flow Controls Direct Mount Packages

**BZ9 Direct Mount Package**
- Sizes: 1/2” ~ 2”
- Bronze Three-Piece ball valve
- Pressure rated for 600 psi
- Full Port flow path for maximum flow
- Built-In ISO 5211 direct mounting pad for easy automation
- End connections include SE (Screwed Ends, FNPT) and TE (Sweat Ends)
- Three-piece “swing-out” design offers easy access for in-line maintenance

**SB9 Direct Mount Package**
- Sizes: 1/2” ~ 4”
- Sanitary Ball Valve
- TFM1600™ seat and body seal material complies with FDA CFR Title 21 Part 177.1550
- “Tube-ID” flow path for drainability
- Three-Piece “swing out” design offers easy access for in-line maintenance
- Built-In ISO 5211 direct mounting pad for easy actuation
- Blowout proof stem adds safety & reliability
- All materials comply with applicable ASTM material specifications as well as FDA and USDA requirements
- End connections include Tri-Clamp and Extended Tube O.D.
- Standard Anti-Static Device

**MB51 Direct Mount Package**
- Sizes: 1” ~ 6”
- Multi-Ported, Flanged 3-Way Ball Valve
- L-Port and T-Port options
- Positive shut-off on any of the three ports
- Built-In ISO 5211 direct mounting pad for easy automation
- Blowout proof stem adds safety and reliability
- Available in Stainless and Carbon Steel construction
- Full Port Flow Path for maximum flow
- ANSI 150 Flanged Ends

**MZ9B Direct Mount Package**
- Sizes: 1/2” ~ 2”
- Economical 3-Way Ball Valve
- Pressure rated for 1000 WOG
- L-Port and T-Port options
- Positive shut-off on any of the three ports
- Full Port Flow Path for maximum flow
- Blowout proof stem adds safety and reliability
- Complete 316 Stainless Steel construction
- Threaded Ends (FNPT)
SVF Flow Controls Direct Mount Packages

**EZ9 Direct Mount Package**
- Sizes: 1/4” ~ 4”
- Pressure rated for 1000 WOG
- 316 Stainless Steel body, ball and stem
- 316 Stainless Steel ends
- Live-loaded stem seal design
- Blowout proof stem adds safety & reliability
- Screwed Ends (FNPT)

**BEV9 Direct Mount Package**
- Sizes: 1/2” ~ 2” (Full Port)
- Pressure rated for 1000 WOG
- 316 Stainless Steel body, ball and stem
- 316 Stainless Steel ends
- Live loaded stem seal design
- Blowout proof stem adds safety & reliability
- Threaded Ends (FNPT)

**B41 Direct Mount Package**
- Sizes: 1/2” ~ 8”
- Fire Safe Certification to API 607
- Certified to API-608 to meet the additional design, operational and performance requirements of the Petroleum, Refining, Petrochemical Processing and Chemical Processing Industries
- Standard NACE MR 0175
- Built-In ISO 5211 direct mounting pad
- Standard seat material is TFM1600™.
- Optional Seats for higher temperature, steam, and thermal fluid applications
- Live-loaded stem seal ensures seal-tight pressure containment

**StreamLine Butterfly Valve Direct Mount Package**
- Sizes: 2” ~ 12”
- 150 PSI Rated
- Epoxy coated Ductile Iron Body
- 316 Stainless disc & stem
- ISO 5211 Direct Mount pad
- Lug or Wafer Design

- Cast Steel Flanged Globe Valve
- Maximum Pressure 285 PSI
- Maximum Temperature 1000°F
- Ourside Screw & Yoke
- API 600 compliant
- ASTM A216
- Standard NACE MRO175

#### 422 Series
Cast Steel Flanged Check Valve  
2” to 12”

- Cast Steel Flanged Swing Check
- Maximum Pressure 285 PSI
- Maximum Temperature 1000°F
- Bolted Cover
- ASTM A216
- Standard NACE MRO175
**SVF Flow Controls “C” Series Valves**

### BEV9B Series
**Full Port**
**1/2” to 2”**

- 316 Stainless Steel Body, Ball and Stem
- Pressure rated for 1000 WOG
- Full Port for maximum flow
- Designed and built for economical performance
- Threaded end connectors
- Built-In ISO 5211 Direct Mounting Pad for easy actuation
- Blowout proof Stem adds safety and reliability

### EZ9B Series
**Full Port**
**1/4” to 4”**

- 316 Stainless Steel Body, Ball and Stem
- Pressure rated for 1000 WOG
- Full Port for maximum flow
- Designed and built for economical performance
- Socket Weld complies with ANSI B16.11
- Anti-Static stem device standard
- Built-In ISO 5211 direct mounting pad for easy automation
- End connections include SE (Screwed Ends, FNPT) and SW (Socket Weld)
- Three-piece “swing out” design offers easy access for in-line maintenance
- Blowout proof stem adds safety & reliability
- Adjustable stem seal gland

**EZ-TORK Actuator**
- Hard Anodized aluminum housing
- Double Acting or Spring Return
- Nickel Plated Alloy drive shaft
- ISO/NAMUR design for universal mounting and accessory attachment
- Bi-Directional Stroke Adjustment
- 1/8" , 1/4" FNPT & 1/2" air inlet manifold
- Actuator is designed for 120 psi supply air pressure

**aero2 Actuator**
- Hard Anodized aluminum housing
- “Versa-View” Continuous mechanical position indicator
- Nickel Plated Alloy drive shaft
- ISO/NAMUR design for universal mounting and accessory attachment
- Bi-Directional Stroke Adjustment
- 1/4" FNPT air inlet manifold
- Actuator is designed for 120 psi supply air pressure

**SR- SERIES Spring Return Electric Actuator**
- NEMA 4X, IP67 certified enclosure
- Heavy duty, fully enclosed high performance spring return fail safe actuator
- Superbly engineered, emergency shut down device designed for ball, butterfly and quarter turn valves
- Built in thermal protection prevents motor burnout
- Available 4-20mA signal input for controls
- Optional clutchless manual override
- Available for loads up to 2,302 in-lbs

**QUAD4 Actuator**
- ISO 5211 bottom flange for valve automation
- NAMUR output drive for installation of limit switches and positioners
- Anodized aluminum with polyester coating
- Available in Spring Return and Double Acting models
- NAMUR interface for mounting of solenoid valve
- 1/4" FNPT air inlet manifold
- Actuator is designed for 120 psi supply air pressure

**E- SERIES Electric Actuator**
- Heavy duty, fully enclosed high performance motor rated for On/Off & modulating service
- Corrosion protection with thermally bonded polyester coating
- All motors feature integral thermal overload protection
- Designed for operation in temperatures from -40°F to 150°F

**EM- SERIES Electric Actuator**
- NEMA 4X, IP67 certified enclosure
- Heavy duty, fully enclosed high performance motor rated for On/Off & modulating service
- Built in thermal protection prevents motor burnout
- Available 4-20mA signal input for controls
- All models feature a manual override, ISO mounting pad and are wired for light indication
- Available for loads up to 39,825 in-lbs
NEXTEK Controls is a family of valve automation products that includes a range of actuators and accessories for the automation of quarter-turn valves that provide field control and connectivity.

The NEXUS-LP™ or NEXUS-LPX™ discrete valve controller provides an optimized solution for on/off valve control & position sensing for the process industries.

- Integrated Solution (switches, sensors, pilot and spool valve in a single platform)
- NEMA 4/4X, IP67 (NEXUS-LP™) or ATEX NEMA 7 (NEXUS-LPX™) certified
- Suitable for use on rotary applications for double acting or spring return actuators.
- NAMUR and ISO 5211 adjustable bracket mounting
- 5/2 Aluminum spool valve, anodized and polyester coated
- 2 x 1/2” FNPT conduit entries
- Integrated pilot valve (CV = 1.4) with manual override to operate spring return and double acting actuator

The NEXUS-LS™ or NEXUS-LX™ Limit Switch is a reliable and compact position feedback device fitted with two mechanical SPDT switches rated for 5A service.

- NEMA 4/4X, IP67 (NEXUS-LS™) or ATEX / NEMA 7 (NEXUS-LX™) certified
- “Quick-Set” cam is spring loaded and requires no special tools for calibration
- Dual 1/2” FNPT conduit entries facilitate wiring in the field and for additional ancillary pilot valve connections
- Captive cover bolts remain intact during wiring to prevent loss
- Stainless Steel trim and mounting hardware
- Rugged and Compact design

The Vector PV4, Vector PV7 or Vector PV9 pilot valves are UL/CSA approved, direct mount (NAMUR VDI/VDE 3845) valves used to pilot pneumatic actuators.

- NEMA 4/4X, IP67 (Vector PV4), ATEX NEMA 7 (Vector PV7) or Intrinsically Safe, IP65 (Vector PV9) certified
- May be used as a 3-way or 4-way pilot valve for spring return and double acting actuators respectively
- Available in different voltages (120 VAC, 220 VAC, 12VDC, 24 VDC).
- NAMUR mounting interface
- Class “F” coil standard (Vector PV4 and PV9), Class “H” coil standard (PV7)
- Easily field retrofitted for Spring Return and Double Acting applications

The Exact XL Electro-Pneumatic (4-20mA) or Exact P3 Pneumatic (3-15psi) positioners controls the position of a rotary actuator and its final control element by modulating the flow of air supply to the actuator.

- NEMA 4, IP66 certified
- Exact XL controls the position of a rotary actuator in response to an analog 4-20mA signal input
- Exact P3 controls the position of a rotary actuator in response to a controlled input pressure of 3 to 15psi
- NAMUR and ISO 5211 adjustable bracket mounting

The “V” Series Electro-Pneumatic (4-20mA) or Pneumatic (3-15psi) positioners are designed and manufactured to offer years of trouble-free and economical operation.

- ATEX NEMA 7 or Intrinsically Safe certified
- Modular / field upgradable design
- Precision Click-Lock™ Calibration
- NAMUR and ISO 5211 mounting
NEXUS-PS Proximity Switch

The NEXUS-PS™ is a low profile sensor that delivers valve position status in demanding environments (IP67). The technology utilizes two reed devices that sense a magnetic target in the open and closed positions.

- Corrosion resistant (non-metallix + stainless construction)
- Hermetically sealed reed elements
- Handles both AC and DC current
- Zero power required to operate

Declutchable Manual Override

The SVF Series “DMO” allows simple and reliable manual positioning of valves, dampers, and other quarter turn devices to override existing pneumatic or hydraulic rotary actuators.

- Compact, modular design - fits between valve and actuator for a complete manual override
- ISO 5211 Industry Standard mounting pad
- Three stage coupler (Actuator, Gear, Valve)
- Rugged declutch lever and engagement handle

Gear Operator

The SVF Series “GO” manual quarter-turn gear operators are rugged, industrial grade products manufactured with steel housing components

- Cast Carbon steel housing
- Steel input shaft
- ISO 5211 Industry Standard mounting pad
- Integral position indicator

Filter Regulator

The SVF Filter Regulator provides accurate pressure regulation and high moisture removal.

- Compact design
- Pressure gauge in PSI and BAR
- Maximum Pressure: 230 psi
WE ARE AVAILABLE 24/7
